Isoflavones

Soy isoflavones are found in soy food, like tofu, soy milk, soy nuts and are know as plant estrogens. These estrogens may suppress cancer

cells growth. Western diet are poor in isoflavones while in the orient, where soy and soy products are daily included in their diets, the incidence of prostate cancer is considerable less.

Vitamin D

Vitamin D appears to be beneficial for prevention and treatment of cancer. The main source of vitamin D is the sun. Vitamin D is also found in fortified milk and milk derivatives like

cheese but often not in quantity. Supplementation is advisable.

Vitamin E

Vitamin E is a powerful anti-oxidant and it has been found to be beneficial for cancer prevention and treatment. Vitamin E is found in vegetable oils, nuts and green leaf vegetables. Our supplements include quality vitamin E.

Vitamin B6, B12, Folate.

Vitamin B6, found in cereals, nuts, seeds and lentils, together with Vitamin B12 mainly present in meat,

poultry, fish and eggs, and Folate present in spinach, brussel sprouts, and broccoli, play a role in general health and disease prevention and treatment.

Selenium

Selenium is an essential mineral for good health. The

best dietary sources are brazil nuts, bread, and seafood. However, the selenium included in plants depends largely of the soil where the plant is cultivated. Therefore

to assure the right amount intake, supplementation of this mineral is advisable.

Manufacturing

Our products are manufactured at a NSF-GMP registered facility for high quality assurance. The quality of

our products are guaranteed "In Process Quality Control," to ensure compliance with specification at all stages of manufacturing. Rigorous quality assurance standards are met via high-tech lab equipment and state-of-the-art manufacturing processes.

^{*} This statement has not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Men's concerns

Recent studies reveal the importance of a health diet for prostate cancer prevention and treatment. The risk of developing prostate cancer may significantly reduce by changing diet. Men

already diagnosed with prostate cancer can benefit from the right diet and supplements by increasing the intake of critical nutrients.

For prostate health a diet should include food like brazil nuts, broccoli, tomato, whole wheat bread and soy products, along with specialized supplements to assure that the right ingredients are included in your daily diet.

Prostate-C formulated to help the prevention and treatment of prostate diseases. It contains high doses of Vitamin D, E, Vitamins B6, B12, Folate, Lycopene, Isoflavones and Selenium.*

Prostate-BPH formulated to help prostate health and relief prostate enlargement symptoms. It contains pharmaceutical grade saw palmetto and beta-sitosterol besides other important ingredients for prostate.*

We have nutritional supplements addressing other men's concerns like impotence, libido improvement and sexual life.

Natural Male contains selected herbs to help men sexual activity, improving erection and libido. Horny goat weed, tribulus terrestris, maca and tongkat-ali are some of the ingredients included in this product*

Vigor-SuperX male enhancement formula contains the powerful tongkat-ali, an herb found only in Indonesia and Yohimbine. These two herbs combined plus other ingredients may boost sexual performance, libido and pleasure. *

Women 's concerns

While the breast cancer cause is unknown, it seams to be hormone-dependent. Women whose ovaries do not function and who never received hormone therapy do not develop breast cancer as we know. A comprehensive plan for breast cancer may include supplements to help improve quality of life and survival.

Breast-C unique herbal, vitamins and minerals supplement specifically formulated for women's breast health. It includes vitamin C, D3, E, B6, folate, B12, zinc, selenium, isoflavones, lycopene and black cohosh extract in doses not found in most similar products*

Other women 's concerns are menopause and osteoporosis.

Menopause-R formulated to help relief menopause or PMS symptoms. It is a powerful mix of vitamin E, dong quai, black cohosh, DHEA, and other ingredients specifically selected and blended in the right doses to achieve results.*

Many young women may have concerns on the size of their breasts. While this can be a psychological factor, many times it is powerful enough to decrease life enjoyment. Some herbs contains estrogen-like substances that may help women to gain larger and firmer breasts.

BiggerBra, our nutritional supplement to help women to get larger and firmer breasts. This product is a proprietary blend of specialized herbs that combined may accomplish the task. Included are fenugreek and fennel, two traditional herbs, that combined with other herbs like damiana and blessed thisle, may boost hormones that cause breast enlargement. This product must be taken at least 3 months for results.*

Products for general health and sports.

Not all vitamin supplements are created equal. Most overthe-counter supplements do not contain all the ingredients and doses enough to make any difference. Our supplements are formulated for results.

Perfect Balance high-potency multivitamin for men and women. It includes all vitamins and minerals your body needs in the right dose. It is by far superior to most multivitamin supplements available in the market.

Ambio-Antioxidants. Free radicals can damage cells, cause heart disease, cancer and other health conditions. This powerful antioxidant formula is perfect to take with any of ours other products for maximum results.

For sports, we created a high potency, high dose multivitamin complex to boost athletes performance and other sports activities like bodybuilding. Athletes and others in hard training lose nutrients faster than others. Therefore those nutrients should be replaced by taking vitamin supplementation in the right doses.

Heavy Duty our super dose multivitamin is formulated considering the metabolism acceleration from intense sports activities and the need to replace them for optimum performance and results.

Some of our ingredients

Lycopene

Lycopene is a powerful antioxidant most abundant in tomatoes, but also found in guava and watermelon in less quanti-

ties. Cooked tomatoes, ketchup or tomato paste provides more lycopene than raw tomatoes. There are scientific studies concluding that the diet based on tomato products is associated with lower risk of prostate cancer.
